

### SWAN GREEN BUS SHELTER (3) - groundworks

SPC has approved installation of a wooden bus shelter, more in keeping with the locality, to replace the dilapidated metal one. Assuming all applications are approved work should begin in April and take about one week.

Contractor	Specification	Cost
The Shed Man Chiddingstone, Kent Andy Baker 01892 870006 07785 745213 wwwtheshedman.info	"Village Rural Bus shelter" excluding the base. ## Parish Council

### Other considerations:

1. Application A for works to be made to Essex Highways (6-8 weeks for permission)
2. Application 20 to Essex Highways to install a new bus shelter
3. Removal of bus stop sign and have signs attached to bus shelter
4. Placement of planters each side of bus stop to enhance rural setting (Application to be made to Essex Highways and costs to be investigated)
5. To take over responsibility of litter bin at bus stop
6. Kessel Curb (grants available once application approved)
7. Traffic control – costs involved. Traffic management company confirmed that the works will need to have a 2 way traffic system whilst the works go on.
